

# Index

Page numbers in *italics* refer to illustrations; those in **bold** refer to tables

## A

- ABO blood group system 152–153, **153**
- activated partial thromboplastin time (APTT) 140, 141
- activated protein C (APC) 139, 148, *148*
  - resistance to 148–149
- acute lymphoblastic leukaemia (ALL) 89–90, *89*
- acute myeloid leukaemia (AML) 105, 106–109, **106**, 107, 108
  - therapy-related 108
- acute promyelocytic leukaemia (APML) 108–109
- adult T-cell leukaemia/lymphoma (ATLL) 72
- all-*trans* retinoic acid (ATRA) treatment 109
- amyloid 102–103
- amyloidosis 99, 102–103
- anaemia 11–26
  - aplastic 125–128
  - macrocytic **13**, 21–26
    - B12 and folate deficiency 21–25, 32
    - megaloblastic 21–25, 32
    - normoblastic 25–26
  - microcytic 13–20, **13**, 14
    - iron deficiency 13–19
  - morphological classification **13**, **13**
  - normocytic **13**, 20–21
    - anaemia of chronic disease (ACD) 20
    - refractory (RA) 110
      - with excess blasts (RAEB) 110
      - with ring sideroblasts (RARS) 110
  - see also* aplastic anaemia; haemolytic anaemia; sickle cell anaemia
- anticoagulant drugs 146–147
- antiglobulin test 38, 154
- antiphospholipid syndrome 149
- antithrombin 148, *148*
- aplastic anaemia 125–128, **126**, *127*
- apparent polycythaemia 113
- Auer rods 107, *107*
- autoimmune haemolytic anaemia (AIHA) 36, 37–39
  - cold haemagglutinin disease 38–39, 39
  - warm AIHA 37–38

## B

- B cells 65–69
  - development **7**, **8**, 66
  - selection 70
  - signalling 78
    - inhibitors 77, 78
- basophilia 56, 58
- basophils 5, **9**
- Bence-Jones proteins 100
- benign paraproteinaemia 102
- Bernard–Soulier disease 138
- bleeding time test 134
- blood transfusion 151–152
  - antiglobulin test 154
  - cross-matching and compatibility 153–154
  - cryoprecipitate 157
  - fresh-frozen plasma (FFP) 156–157
  - granulocytes 157
  - hazards of 157–161, *157*
    - acute lung injury 160
    - circulatory overload 160–161
    - citrate toxicity 161
    - graft-versus-host disease 160
    - haemolytic reactions 158
    - immediate-type hypersensitivity 160
    - infection transmission 158–160
  - management of reactions 161
  - massive transfusion 161–162
  - obtaining compatible blood 154
  - platelets 138, 157
  - red blood cells 152–154
- bone marrow 1–9
  - acute myeloid leukaemia 107
  - aplastic anaemia 126–127, **126**, *127*
  - chronic myeloid leukaemia 111
  - essential thrombocythaemia 116
  - haemolysis 28–29, 29
  - iron deficiency 19, 19
  - lymphoma 76
  - myelodysplasia 110
  - myelofibrosis 114
  - plasma cell myeloma 98, 99

bone marrow transplantation 109, 117–123  
 allogeneic 117–121, 118  
   complications 119, 120  
   haploidentical transplant 121  
   immunosuppression 119–120  
   reduced intensity conditioning transplant 121  
   stem cell source 119  
 autologous 117, 118, 121–122, 122, 123  
 indications 117  
 Burkitt lymphoma 72, 72, 95–96

## C

chronic lymphocytic leukaemia (CLL) 69, 90–92, 91  
 chronic myeloid leukaemia (CML) 111–113, 111, 112  
 chronic myelomonocytic leukaemia (CMML) 110  
 circulatory overload following transfusion 160–161  
 citrate toxicity 161  
 clonality studies 167–168, 167  
 coagulation pathway 138–140, 138, 139  
   acquired disorders 145–146  
   congenital disorders 141–145  
   tests for clotting defects 140–141  
 cobalamin *see* vitamin B12  
 cold haemagglutinin disease 38–39, 39  
 cryoprecipitate 157  
 cytogenetic analysis 90, 93, 95, 100, 111, 163–165, 164  
 cytomegalovirus (CMV) infection 62–63  
   following bone marrow transplantation 120  
   transfusion-transmitted infection 159

## D

Diamond–Blackfan anaemia 128  
 diffuse large B-cell lymphoma (DLBCL) 72, 73, 94–95, 96  
 disseminated intravascular coagulation (DIC) 106,  
   108–109, 145–146  
 Döhle bodies 57, 57  
 dyskeratosis congenita 128

## E

ecchymoses 132, 133  
 eosin-5-maleamide (EMA) binding test 32  
 eosinophilia 56–58  
 eosinophils 4–5, 9  
 Epstein–Barr virus (EBV) infection 61–62, 62  
   Burkitt lymphoma association 71–72  
   immune response 61–62, 62  
 erythrocytosis (*see also* polycythaemia) 26  
 erythropoiesis 6–7, 12–13  
 erythropoietin (EPO) 7, 113  
 essential thrombocythaemia 115–116  
 extranodal marginal zone lymphomas 96

## F

factor IX deficiency 144  
 factor V Leiden 148–149  
 factor VIII deficiency 141–143  
   autoantibody-mediated 146  
 Fanconi anaemia 128  
 ferritin 14, 18  
   iron deficiency diagnosis 18–19, 18  
 fibrin 139  
   degradation products (FDPs) 140  
 fibrinolytic mechanism 140, 140  
 flow cytometry 59, 59–61, 60, 107, 108  
 fluorescence *in situ* hybridization (FISH) 165, 165  
 folate 21, 23  
   deficiency 21–25, 23, 32  
 follicular lymphoma 92–93  
 fresh-frozen plasma (FFP) 156–157

## G

gene expression profiling 72, 73  
 glandular fever *see* infectious mononucleosis  
 Glanzmann disease 138  
 glucose-6-phosphate dehydrogenase (G6PD) deficiency  
   33–36, 35  
 graft-versus-host disease (GVHD) 120  
   prevention 119–120  
   transfusion-associated 160  
 graft-versus-leukaemia (GVL) effect 117–118, 120–121  
 granulocytes 3–5, 9  
   abnormalities 57  
   transfusion 157

## H

haemarthrosis 143  
 haematopoiesis 1–3, 2  
 haematopoietic stem cells 1–3  
   transplantation 47, 117, 119, 121  
 haemoglobin 41–43  
   defects 36  
   reference ranges 12  
   structural variants 47–54, 48  
    haemoglobin C 54, 54  
    haemoglobin E 53–54  
    haemoglobin S 48, 50  
    *see also* sickle cell anaemia  
 haemoglobin H disease (HbH) 44, 44, 45  
 haemolysis 27–40, 29, 29  
 haemolytic anaemia 27–40, 31  
   congenital 30–36  
   drug-induced 37, 40  
   immune 36–39, 39  
   non-immune 39–40, 40

haemolytic disease of the newborn (HDN) 154–156  
 haemophilia A 141–143  
 haemophilia B 144  
 haemostasis 131–149  
     classification of defects 132  
     investigation of bleeding abnormalities 147–148  
 hairy cell leukaemia 93–94, 95  
 hand–foot syndrome 50, 51  
 haptoglobin 28  
 HbBart's hydrops fetalis syndrome 44–45  
 heavy chain disease 103  
 Heinz bodies 35, 35  
*Helicobacter pylori* 72  
 heparin 146–147  
 heparin-induced thrombocytopenia (HIT) 137  
 hepatitis E 159  
 hepcidin 15, 15–16  
 hereditary elliptocytosis (HE) 33, 33  
 hereditary haemochromatosis 16  
 hereditary haemorrhagic telangiectasia 134, 134  
 hereditary persistence of fetal haemoglobin (HPFH) 52–53  
 hereditary pyropoikilocytosis 33  
 hereditary spherocytosis (HS) 30–33, 32  
*HFE* haemochromatosis 16  
 HIV infection 63, 137, 142  
 HIV-related lymphoma 96  
 Hodgkin lymphoma 71, 76, 82, 85–89  
     nodular lymphocyte predominant 85  
     nodular sclerosis 85, 86  
     Reed–Sternberg cells 71, 72, 85–86, 86  
     staging 87, 88  
     treatment 87–88  
         *see also* lymphomas  
 Howell–Jolly bodies 14, 25  
 human T-cell leukaemia virus 1 (HTLV-1) 72  
 hypercalcaemia 99  
 hypersensitivity reactions following transfusion 160  
 hypersplenism 40  
 hyperviscosity syndrome 99, 99  
 hypogammaglobulinaemia 91  
 hypoxia inducible factor (HIF-1) 7, 15

**I**  
 immune thrombocytopenic purpura (ITP) 132, 133, 135–137  
     *see also* thrombocytopenia  
 immunoglobulins 66–70, 68  
     gene rearrangement 68, 70  
 immunophenotyping 75, 76, 107, 163  
 immunosuppression, bone marrow transplantation 119–120  
 infectious mononucleosis 61–63, 61  
     immune response 61–62, 62

integrated haematology laboratory report 171  
 iron absorption 14–16  
 iron deficiency anaemia 13–19, 17  
     causes of deficiency 16–17  
     diagnosis 18–19, 18, 19  
     treatment 19  
 iron overload 16  
     thalassaemia major 46–47

## L

lactate dehydrogenase (LDH) 28, 76  
 leucocytosis 56–58, 57  
 leucoerythroblastic reaction 63  
 leucopenia 55–56  
 leukaemias  
     acute lymphoblastic (ALL) 89–90, 89  
     acute myeloid (AML) 105, 106–109  
     acute promyelocytic (APML) 108–109  
     adult T-cell leukaemia/lymphoma (ATLL) 72  
     chronic lymphocytic (CLL) 69, 90–91, 91  
     chronic myeloid (CML) 111–113  
     chronic myelomonocytic (CMML) 110  
     hairy cell 93–94, 95  
     versus lymphomas 71  
 lymph nodes 65–66, 67  
     Hodgkin lymphoma 86, 87  
     lymphoblastic lymphoma 90  
     lymphocyte-depleted Hodgkin lymphoma 85  
     lymphocytes 9, 9  
         precursors 8–9  
         *see also* B cells; T cells  
     lymphocytosis 58–59  
     lymphoid lineage 2, 3  
     lymphomas 69, 71–79  
         *see Hodgkin lymphoma; non-Hodgkin lymphoma*  
         classification 81  
         high- and low-grade 73, 73, 74  
         immunophenotyping 75, 76  
         molecular genetics 72–73, 72  
         prognosis 77, 77, 78, 83  
         staging 76, 76, 77, 87, 88  
             restaging during treatment 79  
             treatment and management 77–79  
 lymphopenia 58  
 lymphoplasmacytic lymphoma 92  
 lymphopoiesis 7–9

## M

macrocytic anaemia 13, 21–26  
 macrophages 5, 9  
 major histocompatibility complex (MHC) 70  
 malaria 40, 160

MALT lymphomas 96  
mantle cell lymphoma 69, 93, 94  
megakaryocytes 5, 5, 105  
absence 135  
megaloblastosis 21–25  
metamyelocytes, giant 24, 25  
microcytic anaemia 13–20, **13, 14**  
molecular genetics 165–171  
clonality studies 167, 167–168  
common gene mutations **165**  
next-generation sequencing 169–171, 170  
personalized medicine 171  
polymerase chain reaction (PCR) 166–167, 166  
monoclonal gammopathy of undetermined significance (MGUS) 97, 101, 102, **102**  
monocytes 5, **9**, 105  
monocytopoiesis 5  
monocytosis 56, 58  
mucosa-associated lymphoid tissue (MALT) lymphomas 96  
mycosis fungoïdes 96  
myeloblasts 3, 4, 105  
myelodysplastic syndromes (MDS) 105, 109–110  
myelofibrosis 114–115, **114, 115**  
myeloid cells 105  
myeloid lineage 2, 3  
myeloma 97, **102**  
*see also* plasma cell myeloma  
myelopoiesis 3–7  
myeloproliferative disorders 105, 111–116

**N**

natural killer (NK) cells 8, 65, **66**, 70  
neutropenia 55–56  
neutrophils 3–4, 4, 5, **9**, 105  
hypogranular 110  
inherited abnormalities 57, **58**  
neutrophil leucocytosis 56–57, 57  
next-generation sequencing 169–171, 170  
nodular lymphocyte-predominant Hodgkin lymphoma (nLPHL) 85  
nodular sclerosis Hodgkin lymphoma 85, 86  
non-Hodgkin lymphoma 71, 76, 89–96  
B-cell **84**  
Burkitt lymphoma 72, 72, 95–96  
diffuse large B-cell lymphoma (DLBCL) 72–73, 73, 94–95, 96  
extranodal marginal zone lymphomas 96  
follicular lymphoma 92–93  
HIV-related lymphoma 96  
lymphoblastic lymphoma 90  
lymphoplasmacytic lymphoma 92  
mantle cell lymphoma 69, 93, 94  
small lymphocytic lymphoma (SLL) 91, 92  
T-cell **84**  
*see also* leukaemias; lymphomas  
normoblasts 6

**O**

oxygen-haemoglobin dissociation curves 42, 42

**P**

pancytopenia 125–127  
paroxysmal cold haemoglobinuria 37  
paroxysmal nocturnal haemoglobinuria (PNH) 36, 37, 127  
parvovirus B19 30, 32, 128–129  
pernicious anaemia 22–23, 24, 25  
personalized medicine 171  
petechiae 132, **132**  
Philadelphia chromosome 111–112, **112**, 163  
plasma cell myeloma 97–102, 98  
clinical features 97–99  
diagnosis 100–101  
laboratory findings 99–100, 99, **100**  
staging 100  
treatment 101  
plasmacytoma 101–102  
plasmin 140  
platelet function analyser (PFA) 134  
platelets 5–6, 132–134  
aggregation studies 134  
failure of production 135  
function 6, **9**, 133  
abnormalities 137–138  
tests of 134  
increased splenic pooling 137  
physiology 133–134  
shortened survival 135–137  
transfusion 138, 157  
poikilocytes 17, **17**  
polycythaemia 26, 113–114  
polymerase chain reaction (PCR) 166–167, 166  
post-transfusion purpura 137  
post-transplant lymphoproliferative disorder (PTLD) 61  
primary acquired sideroblastic anaemia 110  
primary myelofibrosis 114–115, **114, 115**  
proerythroblasts 6, 7  
protein C 148, **148**  
protein S 148, **148**  
prothrombin allele G20210A 149  
prothrombin time (PT) 140, 141  
prothrombotic state 148  
pure red cell aplasia 30, 128–129  
purpura 106, 134  
post-transfusion 137  
thrombotic thrombocytopenic (TTP) 137  
*see also* immune thrombocytopenic purpura (ITP)  
pyruvate kinase deficiency 36

**R**

red cells 6–7, **14**, 113  
abnormal cells **14**

enzyme deficiencies 33–36  
erythropoiesis 6–7, 12–13  
function 7, 9  
glucose metabolism 34  
mechanical damage 39–40, 40  
membrane 31  
  defects causing haemolysis 30–33  
transfusion 152–154, 153  
  haemolytic reactions 158  
reduced intensity conditioning transplant 121  
Reed-Sternberg cells 71, 72, 85–86, 86  
refractory anaemia (RA) 110  
  with excess blasts (RAEB) 110  
  with ring sideroblasts (RARS) 110  
renal failure, plasma cell myeloma 98  
reticulocytes 7  
  reticulocyte count 12, 28  
Rh blood group system 153, 154–155

## S

Sanger sequencing 169, 169  
schistocytes 40  
secondary autoimmune thrombocytopenic purpura 137  
secondary polycythaemia 113  
semiquantitative PCR 168  
Serious Hazards of Transfusion (SHOT) report 157–158, 157  
Sézary syndrome 96  
Shwachman-Diamond syndrome 128  
sickle cell anaemia 47–53, 47, 50  
  clinical manifestations 51  
  complications 50–52, 51, 52  
sickle cell trait 48  
sideroblastic anaemia 20, 20  
  primary acquired (RARS) 110  
small lymphocytic lymphoma (SLL) 91, 92  
storage pool diseases 138  
streptokinase 140

## T

T cells 65  
  clonality studies 167, 167–168  
  cytotoxic 8  
  development 7–8, 8, 66  
  T helper (Th) cells 8

T-cell receptors (TCR) 7, 70, 167  
target cells 14  
thalassaemia 16, 43–47  
   $\alpha$ -thalassaemia 43–45  
  haemoglobin H disease 44, 44, 45  
  Hb Bart's hydrops fetalis syndrome 44–45  
   $\beta$ -thalassaemia 45  
  thalassaemia intermedia 46  
  thalassaemia major 46–47  
  thalassaemia minima 46  
  thalassaemia minor 46  
thrombin 139  
thrombin time 140  
thrombocytopenia 132  
  causes 134–137  
  drug-induced 137  
  *see also* immune thrombocytopenic purpura (ITP)  
thrombocytosis causes 115  
thrombophilia 148–149  
thrombopoietin (TPO) 5–6, 114  
thrombotic thrombocytopenic purpura (TTP) 137  
tissue factor (TF) 138–139, 138  
toxic granulation 57, 57  
toxoplasmosis 63  
transferrin 14, 19  
  iron deficiency diagnosis 19  
transfusion *see* blood transfusion  
transfusion-related acute lung injury (TRALI) 160  
transfusion-transmitted infections (TTIs) 158–160

## V

variant Creutzfeldt-Jakob disease (vCJD) 159  
venesection 16, 113, 114  
vitamin B12 21, 23  
  deficiency 14, 21–25, 23  
  biochemical pathways affected 22  
  diagnosis 24–25, 24, 25  
  manifestations 23–24, 24  
  mechanisms 21–23, 23  
vitamin K deficiency 145  
von Willebrand disease 144

## W

Waldenström's macroglobulinaemia 92, 103  
warfarin 147
